

Scientific Diving Training Course

A Long Term Monitoring Programme on Reef Community at Bangka Island (Indonesia)

2 - 11 November 2015

Coral Eye Centre, Bangka Island, Indonesia

Emilio Mancuso

Cost: €950 - Application deadline: 30 April 2015

The course aims to introduce students to the theme of global marine biodiversity and conservation. During the course students will be trained in scientific diving techniques (non invasive techniques) that will be applied by the students to help Coral-Eye team to set the monitoring station and collect 'time zero' data for a long term monitoring project on the reef community.
